## NFM Ballistic Solution

## Overview

#### Description

The document describes the specifications of the requirements and the proposed approach for the project aimed at changing the processes related to ordering and testing tests at the shooting range, as well as designing the ballistic system.

#### Change justification

- 1. Speed, security (access and availability) and functionality of the current solution (Excel)
- 2. Increased efficiency through improvements such as structure search, etc.
- 3. Integration with IoT devices
- 4. Lack of transparent UX of the current solution
- 5. Possibility for future improvements like AI/machine learning

#### Goal

Users have an intuitive system for creating test orders, performing tests, designing new ballistic systems and carrying out their tests (in the shortened path). Solution allows Power BI analysis of collected data from SQL DB.

#### **Construction Creator**

## Description

App to request a shooting test for a specific product. Such test may be described with multiple properties i.e. client, project, standard extensions etc.

### Requirements

#### 1. Shooting Orders app

1.1. Any user should be able to list orders with 3 types of View: QA View, R&D View, All Columns View

QA View	R&D View	All Columns View
Order Name	Queue No	Queue No
Project	Order Name	Order Name
ZK Number	Client	Contact Person
ZP Number	Project	Priority
Product	Institute	Reason for priority
Produced	Contact Person	Order Status
Planned Shipping	Priority	Project
Shipped	Reason for priority	Client
Deadline	Order Status	Institute
Sample Serial Numbers	ZK Number	ZK Number
Sample Quantity	ZP Number	ZP Number
QA Notes	Deadline	Product
Standard Detail	Produced	Produced
Pattern	Planned Shipping	Planned Shipping
Verified by QA	Shipped	Shipped
Test result	Shipped date	Shipped date
Report number	Shipment Tracking Info	Shipment Tracking Info
Root of test	Sample Serial Numbers	Received
	Sample Quantity	Deadline
	Product	Sample Serial Numbers
	Received	Sample Quantity
	R&D Note	QA Notes
	Ballistic System	R&D Note
	Standard Detail	Ballistic System
	Pattern	Standard Detail
	Bullet type	Pattern
	Additional test info	Bullet type
	Test Origin Type	Additional test info
	Test Goal Type	Test Origin Type
	IsShotTest	Test Goal Type
	V50 Target	IsShotTest
	V50 Minimum Required	V50 Target
	PBFS-Target	V50 Minimum Required
	PBFS-Tolerance	PBFS-Target
	Threat	PBFS-Tolerance
	Conditioning	Threat
	Backing Type	Conditioning
	No of shots	Backing Type
	Operator	No of shots
		Operator
		Verified by QA
		Test result

	Report number
	Root of test

# 1.2. Any user should be able to Choose form (QA or R&D) and Create a new order. A new order accepts following information to be filled

## QA Form

Category	Field	Туре	Additional notes
Context Info	Order Name	Text	
	Project	Search box	Quick create new Project
General Info	ZK number	Text	
	ZP number	Text	
	Product	Search box	Quick create new Product
	Produced	Yes/No	
	Planned Shipping	Data	
	Shipped	Yes/No	
	Deadline	Data	
	Sample Serial Numbers	Text	
	Sample Quantity	Number	
	QA Notes	Text	
Standard Detail	Standard Detail	Search box	Quick create new Standard Detail
	Pattern	Custom app	User can select pattern picture from a
			gallery or upload new picture. Pictures will
			be stored in SharePoint
After Test	Verified by QA	Yes/No	
	Test result	Positive/Negative	
	Report number	Text	
	Root of test	Text	

#### **R&D Form**

Category	Field	Туре	Additional notes
Context Info	Order Name	Search box	
	Client	Search box	Quick create new Client
	Project	Search box	Quick create new Project
	Institute	Search box	Quick create new Institute
	Contact Person	Search box	Users taken from O365 tenant
General Info	Priority	Choice	
	Reason for priority	Multiline Text	
	Order Status	Choice	
	ZK Number	Text	
	ZP Number	Text	
	Deadline	Date picker	
	Produced	Yes/No	
	Planned Shipping	Date picker	
	Shipped	Yes/No	
	Shipped date	Date Picker	
	Shipment Tracking Info	Text	
	Sample Serial Numbers	Text	
	Product	Search box	Quick create new Product
	Received	Yes/No	
	R&D Note	Text	

Ballistic System And Standard Info	Ballistic System	Search box	Quick create new Ballistic System
	Standard Detail	Search box	Quick create new Standard Detail
	Pattern	Custom app	User can select pattern picture from a gallery or upload new picture. Pictures will be stored in SharePoint
Test Info	Bullet type	Search box	Quick create new Bullet type
	Additional test info	Text	
	Test Origin Type	Choice	
	Test Goal Type	Choice	
	IsShotTest	Yes/No	
	V50 Target	Number	
	V50 Minimum Required	Number	
	PBFS-Target	Number	
	PBFS-Tolerance	Number	
	Threat	Text	
	Conditioning	Text box	
	Backing Type	Search box	Quick create new Backing Type
	No of shots	Number	
	Operator	Search box	Users taken from O365 tenant

1.3. User can edit Standard details or add a new standard detail extending original standard detail list. Standard details are defined by following fields:

Field	Туре
Standard	Search box
Test Stab/Shot	Choice
Level of Protection	Text
Bullet mass	Number
Bullet type	Search box
Nom Velocity	Number
Min Velocity	Number
Max Velocity	Number
BFS Requirement	Text
Condition requirement	Text
Panel Size	Text
Shots per panel	Number
Additional Notes	Text

- 1.4. User should be able to view order details
- 1.5. User can start test

#### Approach

PowerApps, Model Driven, Canvas

- Data Visualization
- Custom UI and UX design
- Connectors with CDS

CDS

- Database

## Microsoft Flow:

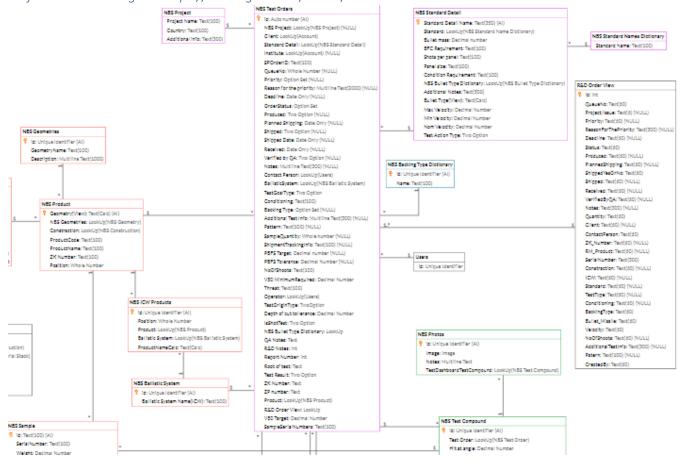

Name	Category	Description
Set Standard Detail Name	Automation	Automaticaly set Standard Detail
		name

## Dictionary

Word/Phrase	Meaning	Synonyms
Product	It is a "Construction" with a	Component of the System
	specific geometry	
Ballistic System	"Product" or set of "Products"	ICW, In Conjunction With,
	that will be tested with "Tested	Panel, Soft ballistic
	Product"	
Standard	Name which includes	
	different "Standard Details"	
Standard Detail	Individual requirements	
	for "Shooting test"	
Ammo Type	•	Bullet type
Shot Test	Specific steps in specific order due	Ballistic test, Shooting Test
	to check if a "Ballistic	
	System" can stand shooting	
	according to a standard	
Stab Test	Specific steps in specific order due	
	to check if a "Ballistic	
	System" system can stand stabs	
	according to a standard	
Test Goal Type	V50 or P-BFS	
Shooting Order	Request of a "Shooting test" for	Test Order
	the specific "Product"	
Shooting Order App	App to request a "Shooting	
	<b>Test"</b> for the specific "Product".	
	Such test may be described with	
	multiple properties i.e. client,	
	project, custom standard	
	detail etc	
Testing Dashboard App	App for conducting a "Shooting	
	test"	
Construction Creator App	App for creating ballistic	
	constructions
